

Dear Peter,

I have to say I did not believe in miracles until I met you. I have been a Chronic Pain Syndrome Suffer for 7 years and I have never been a day without so much pain. I have had surgery, physiotherapy and every other treatment that could be done, including pain management clinics. I have been on Morphine for the past year along with so much medication and still put up with pain.

Thanks to my daughter who found your advertisement THE MUSCLE CLINIC I would not have taken the chance to meet you and to find out that you were the MIRICALE that was going to give me a life to live again. I have to admit that after being told by top Orthopedic Surgeons that nothing more could be done for me I was a bit suspect that this would help but I am in debt to you and the work that you do with muscles because my damage was Back , Tailbone, Pelvic and shoulder damage to bones.

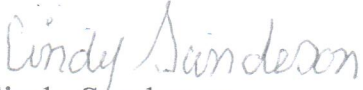

After 1 yes only 1 visit to you I walked away like I have never walked for 7 years without hardly any pain and I have spent the last month just about pain free.

I have told everyone about my miracle and I say to anyone you are not just **good** you are **god** to me.

Peter you should have an office in every city so as others can see you practice your miracle work and you should be registered as a doctor. All I can do is say Thanks, Thanks for giving me a life to live not just surviving as I was doing till I got your treatment. I ask why doctors did not know that most of my pain was muscular. If they have had I would have had a life long before now.

If you need my help in anyway to get others to understand you know what you do does work please do not hesitate to contact me on my mobile that you have.

Yours faithfully

Cindy Sanderson
